Individual Skills Audit — Completed

CET257 Enterprise Project — Assignment 1, Task A2

Each member rated their own confidence 1 (no experience) to 5 (very confident) across the areas below; the Group Roles Report references these results when explaining why each person was allocated their role.

Skills Audit — Shilu Chuke

Skill Area	Rating (1-5)	Notes / Evidence
Frontend / UI development	2	Comfortable editing HTML/CSS layout and content, but not the primary frontend builder.
Backend / application logic	2	Can read and follow the scoring/state logic Sparas wrote, not the main backend author.
3D / graphics (Three.js, WebGL, etc.)	1	No prior 3D/WebGL experience; left to Sparas and Namshu.
UI/UX design & prototyping tools (Figma, Canva, etc.)	2	Basic familiarity with Figma/Canva for quick mockup edits.
Project coordination & scheduling	5	Led sprint planning, the Gantt chart/project plan, and kept the team on schedule across all 8 weeks.
Written communication & documentation	4	Wrote the bulk of the A1 documents, meeting minutes and this skills audit.
Client-facing communication	5	Owned outreach to Sulav G Raj and led all three client meetings.
Testing & quality assurance	3	Ran the final review of all A1–A7 folders against the marking guidance (Week 8).

Skills Audit — Swikriti Bashyal

Skill Area	Rating (1-5)	Notes / Evidence
Frontend / UI development	3	Blocked out early wireframes and contributed to HUD layout decisions.
Backend / application logic	1	No backend/application-logic experience; not part of her role.
3D / graphics (Three.js, WebGL, etc.)	2	Limited 3D experience; worked from Sparas/Namshu's scene rather than building it.
UI/UX design & prototyping tools (Figma, Canva, etc.)	5	Primary tool for wireframes, the website mockups and branding (Figma/Canva-equivalent HTML mockups).

Project coordination & scheduling	2	Coordinates her own design workstream day-to-day rather than overall project scheduling.
Written communication & documentation	4	Wrote the PACT Analysis, marketing strategy draft and website mockup documentation.
Client-facing communication	3	Attended one client meeting; not the primary point of contact.
Testing & quality assurance	3	Reviewed HUD/branding consistency across deliverables before submission.

Skills Audit — Sparas Shrestha

Skill Area	**Rating (1-5)**	**Notes / Evidence**
Frontend / UI development	2	Can make small frontend adjustments but Namshu owns the UI layer.
Backend / application logic	5	Built the checkpoint data structure, scoring engine, login/stats and Admin Command Center.
3D / graphics (Three.js, WebGL, etc.)	4	Built the initial Three.js scene scaffold in Week 2 before handing zone/camera work to Namshu.
UI/UX design & prototyping tools (Figma, Canva, etc.)	1	No Figma/Canva design work; not part of his role.
Project coordination & scheduling	2	Manages his own backend task list; not overall project scheduling.
Written communication & documentation	3	Documents backend logic for the System Requirement Analysis and Requirements traceability.
Client-facing communication	2	Attended one client meeting to answer technical questions.
Testing & quality assurance	5	Ran the full final QA pass across login, all six checkpoints, the admin dashboard and CSV export with no outstanding bugs (Week 8).

Skills Audit — Namshu Hang Zhyedi Magar

Skill Area	**Rating (1-5)**	**Notes / Evidence**
Frontend / UI development	5	Built movement/camera controls, the HUD, all six checkpoints and the bonus/stand-down events.
Backend / application logic	2	Limited backend work; mainly consumes state Sparas exposes.

3D / graphics (Three.js, WebGL, etc.)	4	Built zone navigation, camera smoothing and HUD visuals on top of Sparas's initial scene.
UI/UX design & prototyping tools (Figma, Canva, etc.)	3	Comfortable enough with design tools to polish HUD graphics, not the primary designer.
Project coordination & scheduling	2	Follows the plan rather than setting it.
Written communication & documentation	3	Documents checkpoint content and frontend behaviour for the Requirements document.
Client-facing communication	2	Attended one client meeting; supports demos rather than leading outreach.
Testing & quality assurance	2	Ran weekly playtests and fixed bugs found along the way (Weeks 6–7), though Sparas owned the final QA pass.
